Transforming Adarsh Group with SAP Cloud ERP Private

ADARSH
G R O U P

SAVIC is delivering one of its most comprehensive SAP Cloud ERP Private transformations for Adarsh Group, a leading real estate and infrastructure developer in Bangalore. The project spans core areas such as Finance, Procurement, Sales, Project Systems, Supply Chain, and Document Management—plus embedded analytics and SAP Business AI.

Before: Challenges and Opportunities
- Lack of real-time project visibility and integrated operations
- Disconnected procurement and supply chain functions
- Need for enhanced governance and centralized data

Why SAP and SAVIC Technologies ?
- Industry-specific SAP Activate methodology for real estate and construction
- Advanced capabilities in SAP Business AI and Embedded Analytics
- Unified platform for project, procurement, and finance management

After Value-Driven Results
- Enhanced governance with streamlined project systems
- Agile decision-making enabled by real-time data
- Improved procurement lifecycle and supply chain coordination
- AI-powered planning and intelligent analytics

"SAVIC's SAP Cloud ERP Private transformation empowered us with real-time project visibility, centralized data, and intelligent analytics. Their industry-specific approach streamlined our procurement, finance, and project systems—driving governance and agile decision-making across the board."
