

Alpha Foam Transforms Operations with SAP S/4HANA

Alpha Foam Ltd. is a reputed manufacturer of automotive and industrial foam, adhesives, and NVH (Noise, Vibration & Harshness) solutions. As a key supplier to OEMs and Tier 1 automotive companies, Alpha Foam delivers products that combine lightweight performance with durability and safety.

Before: Challenges and Opportunities

- Manual processes in production planning and BOM control
- Lack of real-time visibility into inventory and order tracking
- Disconnected systems for quality checks and delivery commitments
- Difficulties in managing traceability, costing, and compliance

Why SAP and SAVIC Technologies?

- Integrated ERP for production, finance, sales, and procurement
- Batch traceability and version-controlled BOMs
- Real-time dashboards and predictive analytics
- Support for multi-plant operations and vendor collaboration

After Value-Driven Results

- 360° control across design, production, quality, and finance
- Digitally enabled operations to support future automation, AI, and IoT
- OEM audit-ready system with traceability from raw material to delivery
- Integrated decision-making with predictive analytics and costing insights

ALPHA FOAM LTD

“SAP S/4HANA has enabled us to align production, procurement, and delivery in real time. It’s the engine powering our growth with unmatched visibility and operational agility.”
