Getting critical drugs to consumers more quickly with SAP S/4HANA

BSV established in 1971 by the late Dr. Vinod Daftary researches, develops, manufactures, and markets injectable biological, pharmaceutical, and biotechnology products. BSV's products portfolio includes plasma derivatives, monoclonal, fertility hormones, antifungal, anesthetics, cardiovascular drugs, and equine immunoglobulin /antitoxins.

Before: Challenges and Opportunities

- Support global expansion with a coherent business process and streamlined system landscape
- Establish infrastructure for real-time business management and analytics.
- Simplify IT architecture to lower cost and boost efficiency of IT operations.
- Gain an accurate, full view of cash and reliable liquidity forecasts.

Why SAP and SAVIC Technologies Private Limited

- High visibility and control of business information in real-time with the SAP S/4HANA® Finance solution.
- Differentiated implementation methodology to realize time to value with lower total cost of ownership.
- Intuitive design with the simple, personalized SAP Fiori® user experience to meet the expectation of today's business users.

After: Value-Driven Results

- Improved health and well-being of citizens through high-quality medication.
- Accelerated customer order fulfillment due to efficiencies in inventory control and First Expired – First Out methodology (FEFO)
- Synchronized planning, and production management for controlled inventory.

SAP S/4HANA gives us an integrated IT management platform by optimizing business, support, and management processes. We can process massive amounts of data quickly, adapt to rapidly growing organizational changes, and improve profitability.”

Mr. Seenuvasan S – CIO - Bharat Serums & Vaccines Limited
