

Globus Fashion Elevates Operations with SAP Cloud ERP Private

SAVIC enabled Globus Fashion, a premium Indian fashion retailer, to modernize its core systems by migrating from Microsoft Navision to SAP Cloud ERP Private. The project integrates Finance, Procurement, Sales, and Supply Chain on a scalable ERP platform tailored for retail.

Before: Challenges and Opportunities

- Fragmented legacy ERP system with limited scalability
- Lack of real-time data synchronization across channels
- Manual operations leading to inefficiencies and errors

Why SAP and SAVIC Technologies Private Limited

- Unified ERP solution integrating all retail functions
- Retek POS integration for seamless in-store experience
- Adoption of SAP Activate Methodology for rapid deployment

After Value-Driven Results

- Centralized control and automated workflows
- Improved visibility and decision-making
- Enhanced customer experience and operational agility

"With SAVIC and SAP S/4HANA Private Cloud, we gained centralized visibility and automated operations across our retail network. The unified ERP system helped us elevate customer experience, streamline procurement, and ensure agility in store management."
