

Empowering Gulftainer with SAP Cloud ERP Private

SAVIC executed a major Brownfield migration for Gulftainer, transforming their SAP S/4HANA landscape on Azure into SAP Cloud ERP Private (RISE with SAP) across 4 countries and 6 entities. This strategic project involved complex WRICEF object migration, integration with CARGOWISE, MACH TOS, Sybase, and introduced advanced tools like SAP Analytics Cloud and SAP BTP services.

Before: Challenges and Opportunities

- Legacy system complexity with fragmented workflows
- Need for harmonized reporting and advanced analytics
- Multiple interfaces requiring secure integration

Why SAP and SAVIC Technologies Private Limited

- End-to-end SAP expertise in Brownfield migrations
- Introduction of SAP Analytics Cloud, SAP BTP, Group Reporting, and more
- Focus on future-proofing Gulftainer’s global logistics operations

After Value-Driven Results

- Full landscape transformation across development, QA, and production
- Projected \$23 million annual savings through optimization
- Seamless integration with third-party applications for enhanced automation
- Modern analytics with SAP Analytics Cloud and Group Reporting

“With SAVIC and SAP Cloud ERP Private, we successfully executed a large-scale Brownfield migration across 6 entities in 4 countries. The project enabled full landscape transformation, seamless third-party integration, and modern analytics with SAP BTP—unlocking \$23 million in projected annual savings while securing and future-proofing our global logistics operations.”
