

Indian Additives Ltd. Migrates to SAP S/4HANA with SAVIC

SAVIC successfully executed a Brownfield migration for Indian Additives Ltd., transitioning from an on-premise ECC environment to SAP S/4HANA Suite on HANA, hosted on the cloud. The transformation involved seamless migration of development, quality, and production systems with integrated disaster recovery, compliance automation, and system extensibility.

Before: Challenges and Opportunities

- Fragmented landscape with legacy ECC environment
- Lack of integration with government portals and compliance systems
- No disaster recovery setup or high availability assurance

Why SAP and SAVIC Technologies ?

- Brownfield migration to SAP S/4HANA with minimal business disruption
- Setup of DR landscape and HANA database migration
- Integration with IVL, e-Invoice, e-Way Bill, DocuSign, and statutory systems
- Go-live delivered in 7 months with 1-month hypercare

After Value-Driven Results

- Seamless data continuity and security with disaster recovery
- Real-time integration with government compliance portals
- Improved operational efficiency and platform scalability

“With SAVIC's expert support, our brownfield migration to SAP S/4HANA was smooth and seamless. The system stability, real-time data visibility, and disaster recovery capabilities have significantly strengthened our operational foundation.”
