

How SAVIC enabled Jeyachandran Retail to accelerate growth with a Greenfield Rise with SAP S/4HANA IS Retail transformation

Jeyachandran Retail, one of Chennai’s most recognized retail brands, partnered with SAVIC to implement Rise with SAP S/4HANA IS Retail, transitioning from SAP Business One to a future-ready, fully integrated ERP built for modern retail operations.

Before: Challenges and Opportunities

- Fragmented systems limiting visibility and operational agility across outlets and warehouses
- Complexity in managing over 300,000 product articles with inconsistent pricing and inventory controls
- Manual, error-prone tax compliance processes with GST, e-invoicing, and e-way bill frameworks
- Need for a scalable ERP to support growth and evolving retail strategies

Why SAP and SAVIC Technologies?

Greenfield Rise with SAP S/4HANA IS Retail implementation designed specifically for the retail sector
Integration with GoFrugal POS for seamless store operations and Cygnet for automated GST compliance
Embedded analytics, SAP BTP extensibility, and pricing automation for real-time decision-making
Rapid delivery using SAP Activate Methodology—completed in just 3 months

After Value-Driven Results

- Fully integrated retail ERP covering 7 outlets, 2 warehouses, and over 300,000 product SKUs
- Real-time inventory management, automated pricing controls, and enhanced supply chain visibility
- Seamless GST compliance, e-invoicing, and statutory reporting automation
- Future-ready digital foundation enabling scalable, responsive retail operations for sustained growth
