

PMEA Power Solutions Advances with SAP ERP Private

SAVIC is implementing a Greenfield Rise with SAP S/4HANA Private Cloud Edition (PCE) for PM Electro Auto Pvt. Ltd. to drive precision manufacturing and digital efficiency. The implementation spans across three manufacturing plants and enables a fully compliant, scalable ERP foundation integrated with GST, e-Invoicing, and BTP capabilities.

Before: Challenges and Opportunities

- Manual data entry and siloed systems
- No centralized visibility across plants and functions
- Challenges in compliance and real-time reporting

Why SAP and SAVIC Technologies Private Limited

- Full-suite SAP ERP Private implementation across Finance, Sales, Procurement, Production, Quality, Warehouse
- Integrated SAP DMS, embedded analytics, and BTP extensibility
- Delivered over a 6-month timeline using SAP Activate Methodology

After Value-Driven Results

- Standardized business processes across all plants
- Real-time decision-making powered by analytics
- Improved compliance and digital document control

“SAVIC’s expertise in SAP S/4HANA PCE helped us unify our manufacturing operations and streamline compliance with ease. The intelligent ERP setup with embedded analytics and document management has transformed our processes, enabling real-time insights, operational agility, and long-term scalability.”
