

Realigning Business Management and Financial Processes to Empower Digital Transformation with SAP S/4HANA

SAVIC is implementing SAP S/4HANA Public Cloud for Sankar Sealing Systems across India and the USA, with a planned Go-Live in July 2025 and a duration of 4 months. The implementation will cover Finance, Procurement, Sales, Manufacturing, Quality, and Supply Chain processes.

Before: Challenges and Opportunities

- Lack of integration across Finance, Procurement, Sales, Manufacturing, Quality, and Supply Chain domains
- Manual payment processing leading to operational delays
- Limited time for strategic data analysis due to operational overload
- Difficulty in meeting customer satisfaction expectations due to fragmented processes

Why SAP and SAVIC Technologies?

- Proven expertise in SAP S/4HANA Public Cloud implementations across global markets
- Strong domain understanding and rapid deployment capabilities
- Trusted digital transformation partner in the automotive manufacturing sector

After Value-Driven Results

- Standard template to unify data and business processes and integrate and expand the business network
- 60% automation of purchasing processes
- 50% reduction in manual payment processing time
- 80% more time for data analysis over operations
- Improved MRP (Material Requirements Planning)
- Reduced inventory turnover
- Enhanced customer satisfaction supervision and management of business and finance operations, with integrated information and real-time monitoring
- Improved risk prevention and control, with 51 risk-prevention and control programs designed for 155 standard processes and consolidated in the system

“Implementing SAP S/4HANA has revolutionized our operational processes, providing real-time insights and streamlining our supply chain management.”
