ACCELERATING INTO THE MARKETS QUICKLY WITH SAP S/4HANA®
- SUJAN COOPER STANDARD AVS PVT. LTD

Sujan Group started their journey in 1977 in rubber manufacturing Industries. They have expertise in manufacturing of Body Sealing Components, Fluid Transfer Systems & Vibration Absorption Systemsfor automobiles. Their product ensures a quieter and more comfortable driving experience, by suppressing noise and vibration in the automobile. Manufacturing of these automotive ancillaries is a joint venture between Cooper Standard France and Sujan Group India. Being together as Sujan Cooper Standard increases their capacity to serve the market by two folds.

In order to help them flex their global reach SAP system was considered as one of the most critical need.

Objectives

✓ Adaptive processes that will map the best practices of manufacturing, specifically in the anti-vibration rubber segment.

✓ End-to-end solution that would include core SAP modules, best practices in manufacturing through mapping of appropriate business process, all in a single platform.

Why SAP

✓ Simplified business processes with SAP S/4HANA.

✓ Best practices for automotive enterprise by using proven technology framework.

✓ Automotive solution tailored to business needs.

✓ Reduced cost and faster analysis on SAP HANA

Benefits

✓ SAVIC helped the client in implementing the solution within the defined timelines

✓ Pre-configured solution reduced the costs associated with external implementation resources

✓ An integrated system minimizes operational costs through low interface maintenance and reduces support costs, whilst delivering seamless processes from a single information database.

✓ Improved customer information services through a fully integrated system, which allows for a connected enterprise.

✓ Fully scalable solution that grows with the growth of the organization, without any expensive re-implementations or system migrations.
