How **Upstox** acquired the expertise to deliver consistent results with **Rise with SAP S/4HANA**

Upstox is an online investment brand of RKSV Securities. It is a SEBI-registered financial service provider. Upstox offers a fast, reliable, low cost and easy-to-use trading platform for traders in the Indian stock market

Before: Challenges and Opportunities

- Need to eliminate manual account reconciliation that slows the month-end financial close process.
- Deploy a high-performance sub-ledger that integrates with core systems to manage large data volumes and reconcile valuations for a growing number of financial products.

Why SAP and SAVIC Technologies?

- Proven leader in finance, with decades of experience guiding finance transformations and industry best practices.
- Established support for industry best practices for complex finance and banking topics.
- Simplified data architecture with a common set of posting data and simplified data model delivered through the universal journal in the SAP S/4HANA® Finance solution.

After Value-Driven Results

- Capacity to manage significant amounts of data to accommodate nearly one million daily transactions.
- Consistent data and fast, simple reporting – improving transparency and the user experience.
- Simple, effective compliance management and internal controls to ensure complete and accurate data.
