

How **V R Coatings** raised innovation, high-quality products, and dedication to enhancing the painting industry with **SAP S/4HANA**

VR COATINGS PVT. LTD is engaged in the Manufacturing and Installation of fluid handling equipment's used especially for spraying, dispensing, transferring, metering, proportioning, mixing & dosing equipment's also provides customized solutions for a wide range of liquids and semi-solids like Paint, Sealant, Adhesive, Wax, Oil , Grease, Solvents, etc.

Previously, manual production planning, lack of product costing, and data inaccuracies were major challenges. By implementing SAP and partnering with SAVIC, they achieved efficient ERP management, role-based transaction control, integrated quality inspection, effective material planning, order-based services, reduced procurement lead time, and real-time reporting, resulting in streamlined operations across all plants.
