The project objective included the identification of SAP S4HANA Public Cloud as an effective IT tool which will serve its needs related to systems and processes with the solution in Basis, GRC, ABAP, FIORI, CPI Integration, Finance, Controlling, Project System, PP, QM, SD, SAC, MM, HCM, PM, ARIBA, MRP, FM and COPA.

Before: Challenges and Opportunities

- Replace legacy system landscape with flexible and scalable in SAP S/4HANA
- Acquire implementation expertise and learning on SAP S/4HANA, setting up the business to strategically consult on digitalization.
- Establish a cloud mindset for a better organizational change management process.
- Enable efficient business process management through feature adoption and consumption.

Why SAP?

- By centralizing data management, SAP software **provides multiple business functions with a single view of the truth**. This helps companies better manage complex business processes by giving employees of different departments easy access to real-time insights across the enterprise.

Why SAVIC Technologies?

- SAVIC has a strong leadership commitment to providing a high number of S/4HANA implementations in India, with notable clients such as Noble Hygiene, Tata Tele, Millennium, L&T and Everest. SAVIC also have a Local Skills Factory that provides flexibility in expanding skills quickly, and they are an SAP Platinum Partner with CMMi Level 5 and ISO 9001:2015 certifications. SAVIC also offers local presence and support.
